Active Listening Power Tips

1. Listen to Understand, Not to React

- Don’t plan your response while the other person is speaking.
- Let them finish, then pause before you reply.
- This small pause helps you process and prevents misunderstandings.

2. Reflect & Clarify

- Paraphrase or summarize what you heard:
- ✓ “So what you’re saying is…”
- ✓ “Just to make sure I understood correctly…”
  It confirms you’re aligned and avoids confusion.

3. Be Fully Present

- Put distractions aside
- Show attentiveness with small signals like nodding or short verbal nods (“I see,” “Right,” “Got it”).
- Your focus tells others they matter.
